Section C

[Paragraph questions. Answer any three questions. Each question carries 4 marks].

- 18. State and establish multiplication theorem of expectation.
- 19. Distinguish between joint and marginal probability mass functions.
- .20. Establish a relation between raw moments and central moments.
- 21. Define discrete uniform distribution. Derive its moment generating function.
- 22. Define convergence in probability. Discuss its importance.

(3 x 4 = 12 marks)

Section D

[Short Essay questions. Answer any four questions. Each question carries 6 marks].

- 23. Prove or disprove : Covariance is independent of change of origin but not independent of change of scale.
- 24. Prove that Var(X) = E War(X/Y)]+Var(X/Y)].
- 25. Let $f(x, y) = C xy e^{-(x^2 + y^2)}$, x 0, y 0 be the joint probability density function of (X, Y). Then (i) determine C ; and (ii) examine the independence of X and Y.
- 26. Derive the mean deviation about mean of binomial distribution.
- 27. Establish the lack of memory property of exponential distribution.
- 28. State and establish the weak law of large numbers for independent and identically distributed random variables.

 $(4 \times 6 = 24 \text{ marks})$

Section E

[Essay questions. Answer any three questions. Each question carries 10 marks].

29. (a) Define variance of a random variable X. Show that it is independent of shifting of the ori ,in.

(b) If X and Y are independent random variables, show that Var(X + Y) = Var(X - Y).

30. (a) Define conditional mean and conditional variance.

(b) If the joint probability mass function of X and Y is :

$$f(x, y) = \frac{x + 3y}{24}, (x, y) = (1, 1), (1, 2), (2, 1), (2, 2),$$

find E(X | Y = 2) and Var(X | Y = 2).

31. (a) Distinguish between beta type I and type II distributions.

(b) In case of normal distribution, show that mean, median and mode coincides.

- 32. (a) State Bernoulli's law of large numbers.
 - (b) State and prove Lindberg-Levy CLT.

 $(2 \times 10 = 20 \text{ marks})$

SECOND SEMESTER B.Sc. DEGREE EXAMINATION, MAY 2015

(CUCBCSS-UG)

Complementary Course-Statistics

ST 2C 02—PROBABILITY DISTRIBUTIONS

Time : Three Hours

Maximum: 80 Marks

Section A

[One word questions. Answer all questions. Each question carries 1 mark]

Fill up the blanks :

- 1. If X is a random variable with finite mean, then $E(2X + K) = 2K + \dots$
- 2. The variables which are not stochastically independent are said to be
- 3. If X and Y are independent, then the correlation between X and Y is
- 4. Binomial distribution b(n, p) is symmetric when p =
- 5. Fourth central moment of standard normal distribution is ------

Write True or False :

- 6. Moment generating function does not exist always.
- 7. A curve is mesokurtic when P2 = 0.
- 8. E(X + Y) = E(X) + E(Y).
- 9. Negative binomial distribution possesses all the properties of geometric distribution.
- 10. Normal curve is asymmetric.

(10 x 1 = 10 marks)

Section **B**

[One sentence questions. Answer all questions. Each question carries 2 marks].

- 11. Define central moments.
- 12. Define characteristic function.
- 13. Define skewness.
- 14. Define independence of random variables.
- 15. Define Karl Pearson correlation coefficient.
- 16. Define Cauchy distribution.
- 17. State Chebyshev's inequality.

(7 x 2 = 14 marks)
