FOURTH SEMESTER B.Com. DEGREE EXAMINATION APRIL 2017

(CUCBCSS-UG)

Complementary Course

eri eri eri eri eri			BCM 4C 04—QU	JANTITATIVE T	ECH	INIQUES FOR BUSINESS
Time:	Thre	e Hours				Maximum: 80 Marks
				Par	t A	
				Answer all		tions.
			*	Each question c	arrie	es 1 mark.
	Choo	se the c	correct answer :			
0 3_ 2 ²	1.	Mean o	of Binomial distri	bution is :		
		(a)	np.		(b)	npq.
		(c)	n.		(d)	\sqrt{npq} .
	2.		occurrence of one	e event prevents	the j	possibility of occurrence of others, such events
		(a)	Exhaustive eve	nts.	(b)	Uncertain events.
		(c)	Mutually exclu	sive events.	(d)	Independent events.
	3.		the amount of ch		able	leads to a constant ratio of change in the other
		(a)	Linear.		(b)	Non-linear.
k .		(c)	Positive.		(d)	Negative.
4. Degrees of freedom for variance within samples is:						
		(a)	k – 1.		(b)	N-k.
		(c)	N - 1.		(d)	None of the above.
5. The distribution which is known as 'the law of improbable events:						
		(a)	Poisson distrib	ution.	(b)	Binomial distribution.
		(c)	Normal distrib	ution.	(d)	All the above.
	Fill	in the b	lanks :			상 하게 되는 경험하다는 이번 가는 이번을 모르는 생각이 되었다. 사용하는 사용하는 것이 되었다고 있다면 되었다.
	6.	Rejecti	ing a null hypoth	esis when it is tr	ue is	s called error.
	7.	Norma	al distribution wa	as discovered by		and the state of t
						Turn over

Turn over

- 8. The test applied for large samples is ______.
- 9. The tendency of two or more groups or series of items to vary together directly or inversely is called as ______.
- 10. In case of independent events $p(A \cap B) =$

 $(10 \times 1 = 10 \text{ marks})$

Part B

Answer any **eight** questions from the following. Each question carries 2 marks.

- 11. What is Rank correlation?
- 12. Define Binomial distribution.
- 13. When Poisson distribution is treated as a limited form of binomial distribution?
- 14. What is standard normal variate?
- 15. What are statistic and parameter?
- 16. Explain standard error.
- 17. What is meant by analysis of variance?
- 18. What you mean by non-parametric tests?
- 19. When the Yates correction is used in x^2 test?
- 20. What is statistical hypothesis?

 $(8 \times 2 = 16 \text{ marks})$

Part C

Answer any **six** questions from the following.. Each question carries 4 marks.

- 21. Explain the differences between correlation and regression.
- 22. P(A) = 1/13, P(B) = 1/4 and $P(A \cup B) = 4/13$. Find $P(A \cap B)$.
- 23. A car hire firm has two cars, which it hires out day by day. The number of demands for car on each day is distributed as a Poisson variate with mean 1.5. Calculate the proportion of days on which (i) neither car is used; (ii) Some demand is refused.
- 24. Explain the uses of x^2 test.
- 25. A sample of size 400 was drawn and the sample mean was found to be 99. Test whether this sample could have come from a normal population with mean = 100 and S.D = 8 at 5% level of significance.
- 26. Explain the properties of Normal curve.

- 27. Four dice are thrown 162 times. The occurrence of 2 or 3 is considered as success. In how many throws do you expect (i) exactly 2 success; (ii) at least 1 success.
- 28. A bag contains 8 balls identical except for colour of which 5 are red and 3 white. A man draws 2 balls at random one after another without replacement. What is the probability that one of the ball drawn is white and the other red? What would be the probabilities if ball drawn were replaced before another ball is drawn?

 $(6 \times 4 = 24 \text{ marks})$

Part D

Answer any two questions from the following.

Each question carries 15 marks

29. The following figures relate to the number of units sold in 5 different areas by the sales personnel of a firm. Test whether all the 4 sales personnel's were performed equally.

Area	Salesman (Units sold)				
	Α	В	\mathbf{C}	D	
1	80	100	95	70	
2	82	110	90	75	
3	88	105	100	82	
4	75	90	80	65	
5	85	115	105	88	

30. Fit a Binomial distribution to the data relating to the number of seeds germinating out of 10 damp filters for 80 sets of seeds:

```
No. of seeds germinated ... 0 1 2 3 4 5 6 7 8 9 10

No. of sets ... 6 20 28 12 8 6 0 0 0 0 0
```

31. The sales data of 6 shops before and after a special promotional campaign are given below:

Shops	Sales (before) Rs. in 000's	Sales (after) Rs. in 000's		
A	42	47		
В	50	60		
\mathbf{C}	48	55		
D	53	58		
E	28	32		
\mathbf{F}	31	38		

Can the campaign be judged as success?
